

Dear all,

Applications are invited for a short-term visiting research position at Universidad Carlos III de Madrid (<http://www.uc3m.es/Home>)-Robotics Lab to work in a fascinating environmental project with a small maritime robotic platform.

THE STUDENTS THAT ARE ELIGIBLE FOR THIS POSITION ARE PORTUGUESE STUDENTS OR FOREIGNER STUDENTS ENROLLED IN A PORTUGUESE UNIVERSITY PROGRAM:

- Undergrad students (Erasmus and other exchange programs; free movers are eligible as well).
- PhD students coming for a research stay (preferable).

Possible research directions include (but not limited to):

- Dynamic modeling and control,
- Mechanical parts design and simulation,
- Visual SLAM.
- People tracking and detection,
- Etc.

Dates

The position is available for a maximum of three months between September 2016 and January 2017 (included).

Funding

The Cátedra Camoens UC3M-BS-FRA(<http://portal.uc3m.es/portal/page/portal/ifibid/catedracamoens>) is offering a scholarship up to 600 euros (depending on the research stay period and qualifications/experience).

How to apply?

Send applications (assembled as a single PDF file) to João Valente (jvalente@ing.uc3m.es) and include: a CV; a cover letter with research interests and goals; one reference letter; most relevant publication (if any); and personal website (if any).
