Call for Workshop Proposals

Intelligent Environments (IE) refer to physical spaces into which IT and other pervasive computing technology are woven and used to achieve specific goals for the user, the environment or both.

IE have the ultimate objective of enriching user experience, better manage, and increase user awareness of that environment.

The 13th International Conference on Intelligent Environments (IE'17) will be held at Seoul, the capital and largest metropolis of the Republic of Korea.

As in previous editions, workshops will take place in the first two days of the conference.

The Workshop Program @ IE'17 will be a very interesting and useful tool to complement the regular program with new and emerging topics of particular interest in the scope of Intelligent Environments and related areas.

Workshops that emphasize multidisciplinary and cross-cutting aspects as well as cutting edge topics are especially encouraged and welcome.

Workshop proposal and acceptance process

The decision on which proposed workshop gets accepted will be carried-out through a two-stage process.

Initially, the workshops proposed will be short-listed, based on the quality of the proposal and the relevance of the topics covered.

Later, the workshops will be confirmed in case they have succeeded in attracting a significant number of quality submissions.

Each workshop proposal should contain the following information:

1. Workshop title;
2. Description of the technical and scientific scope of the workshop;
3. Topics of interest;
4. Reasons why the workshop should be held at IE'17;
5. Detailed information about the members of the Workshop Organizing Committee (WOC), naming the contact person;

6. Relevant experience of the WOC;
7. List of members of the workshop program committee;
8. Preliminary version of the workshop call for papers;
9. Structure of the workshop and planned forms of advertising and dissemination.

Workshops can last for half a day or a full day.

Financial support

Some degree of financial support will be given to the workshop organizers, which will depend on the success of the workshop.

Proceedings

All papers accepted in the Workshops Programme will be published as a volume of the Ambient Intelligence and Smart Environments Series by IOS Press, and made electronically available through ACM Digital Library.

These Proceedings will be submitted for indexation by the Conference Proceedings Citation Index (CPCI) from Thomson Reuters.

Workshops chairs

Cesar Analide (Universidade do Minho, Portugal)

Pankoo Kim (Chosun University, Korea)

General chairs

Jason J. Jung (Chung-Ang University, Korea)

Andrés Muñoz (Universidad Católica de Murcia, Spain)

Important dates

Submission of workshop proposals: 15th December 2016

Workshops decision: 21st December 2016

Workshops paper submission: 24th April 2017

Workshops days: 21st-22nd August 2017
